**is a mutual aid society, founded in Rome (Italy) in 2018. Like all organizations made up of people, mutual societies are non-profit. People voluntarily join mutual societies and make a contribution to achieve the main purpose of the Mutual Societies.**

## Mutual Societies

Mutual aid societies, formed in the UK spontaneously at the age of the first industrial revolution (at the end of the 1700s).

They were the first free organizations that took on the task of realizing, on a voluntary basis, a form of social welfare. Their value has stood the test of time and they still constitute a very important point of reference for citizens looking for insurance coverage and for social enterprises of all kinds.

Today, with the help of technology, we intend to soon become a point of reference for communities of foreign origin established in Italy.
